OVERVIEW/FEATURES

More enduro than cross country; the Bandit 29 has aggressive geometry and a stout frame that gives you the confidence to go anywhere without sacrificing on the way up. Based around 140mm travel forks; the Bandit 29 features 130mm rear wheel travel, a tapered headtube and 142mm x 12mm thru-axle dropouts for a stiff rear end. A slack head angle and low bottom bracket combined with the increased axle height of the 29" wheels gives the rider a more stable, planted feel on the trail. On a Bandit 29 you are "IN" the bike, not "ON" the bike. The Bandit 29 offers amazing cornering traction and increased confidence while descending in a lightweight package that makes it fun to earn your turns.

REAR TRAVEL:	130mm (5.1") Rear Wheel Travel
REAR SHOCK:	7.5" x 2" (Forward Pin 15.75mm x 8mm, Rear Pin 15.75mm x 8mm)
