# BOTTLEROCKET

We classify the BottleRocket as the original slopestyle bike that set the standard for a new generation of bikes. Knowing not everyone has access to a slopestyle park we designed the BottleRocket to be one of the best do it all short travel freeride bikes around. Our customers use their BottleRockets for almost every type of riding and who can blame them. The bike is just at home in the air doing tricks as it is ralling singletrack or shredding Whistler trails. The BottleRocket geometry created a revolution for a new style of bikes to come and to this day we haven't changed the magic numbers that we feel achieved perfection. The combination of shorter chainstay lengths, lower BB and the perfect head angle all work together to create a ride that is one of our funnest bikes. Responsive in corners, easy to manual and bunny hop and complete stability in the air all add up to one of our most versatile geometries we have ever created.

REAR TRAVEL:	140mm (5.5") Rear Wheel Travel
REAR SHOCK:	7.875" x 2.25" (Forward Pin 22.2mm x 8mm, Rear Pin 22.2mm x 8mm)
