## TR500 OVERVIEW

The TR500 is a team rider favorite designed to win races, whip big jumps and crush laps at the bike park. Proven geometry with smart adjustment options and the most versatile setup choices on the market make the TR500 the ultimate downhill bike. The rear suspension leverage curve has been refined with years of input from our pro riders, and the geo has proven itself around the world. The TR500 is ready for anything you can throw at it, from gnarly race courses to big senders.

- Supports 26 or 27.5 Wheels
- 180mm or 200mm Travel Settings
- Integrated Fork Bumpers
- Internal Cable Routing
- Adjustable Chainstay Length, Head Angle and BB Height
- New Laser Etched Adjustment Markings
- Medium Frame Weight With Rear Shock: 10.98 lbs.

09:13 |

*"The TR500 is something special, a downhill bike that feels familiar right out of the box, with impeccable handling that reduces the time needed to unlock its secrets and increases the amount of time available for pushing it as hard as possible. When you're spending hard earned dollars on lift tickets or race entry fees, the last thing you want is to waste time trying to relearn all the little handling quirks of a bike every time you roll it out of the garage. That's where the TR500 shines - just hop on and start charging, and the TR500 will get the job done in style, whether it's roaring across the finish line, or whipping sideways over a floaty booter. While it may not garner the same amount of press as the carbon race steeds of the World Cup circuit, that doesn't mean it's any less capable, and the adjustable geometry allows it to be configured to meet just about any rider's needs."*
