TRANSAM 29 OVERVIEW

The ultimate trail hardtail just got a whole lot cooler. The latest TransAM has been updated with super short 418mm chainstays, longer front center, stealth dropper support, and an all new dropout design. Our custom FAST (Freedom Axle System Technology) dropout uses a Syntace 142mm axle, but allow for chainstay length

adjustment or singlespeed builds in a clean and tidy package. The TransAM was built following a strict recipe blending equal parts fun, value and style. Just like its namesake, the TransAM is powerful and ready to take you anywhere.

- Progressive Geometry - Long, Slack & Low
