VANQUISH

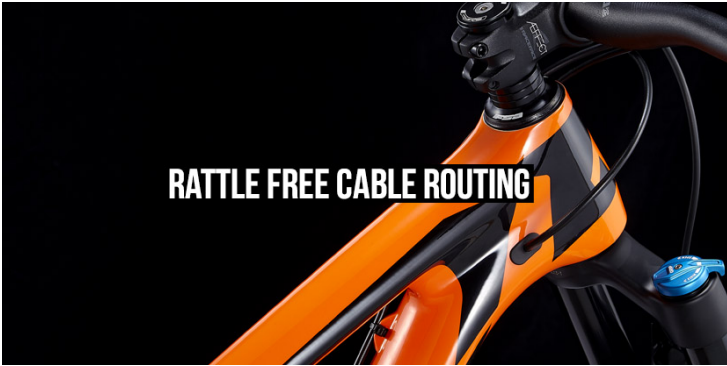

120MM FRONT/29" WHEELS

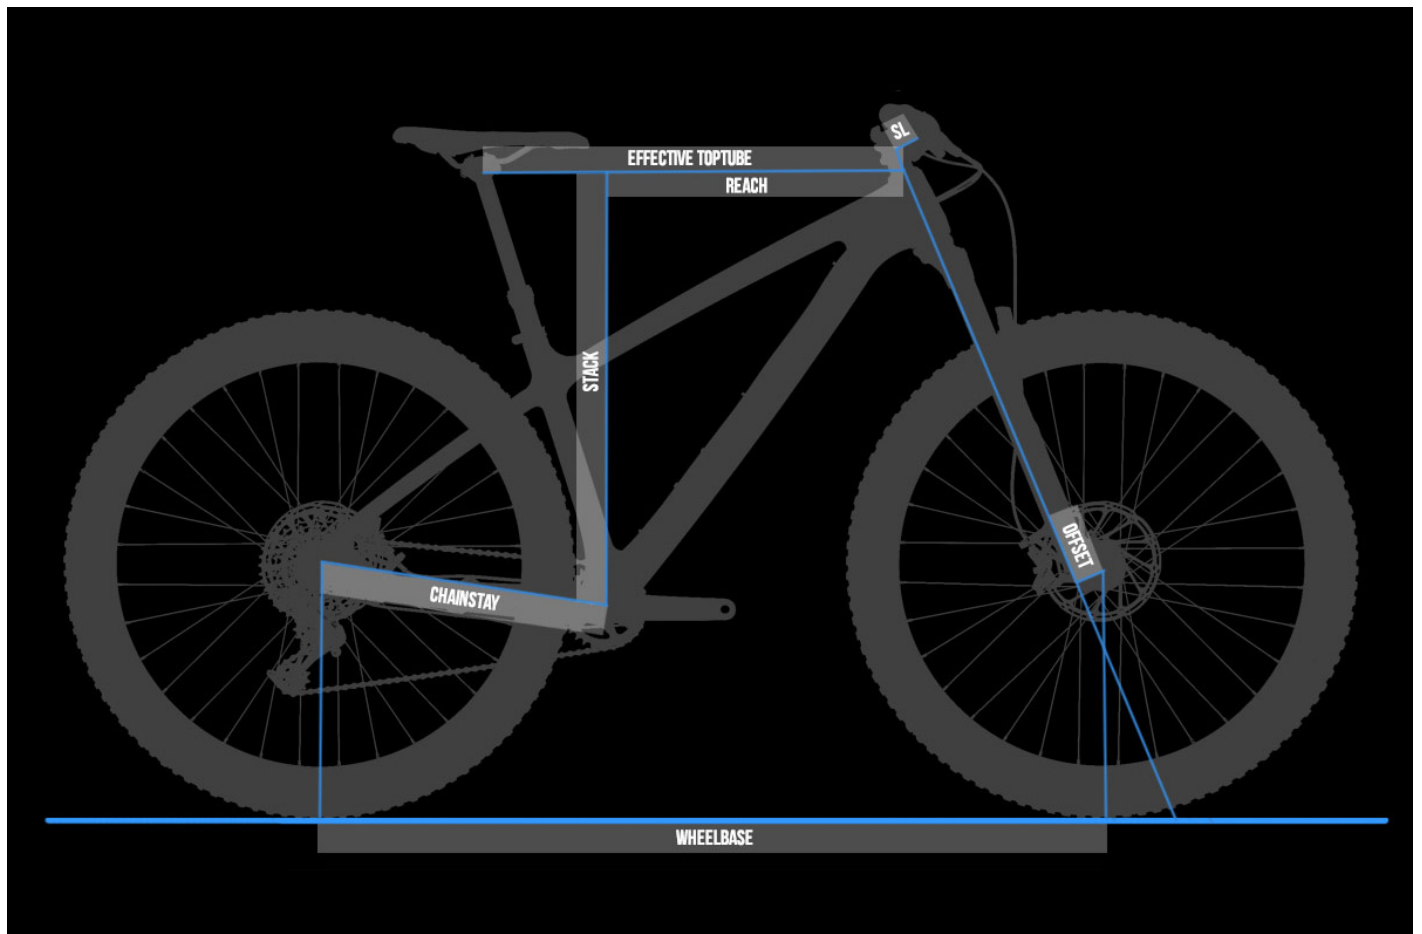

The Vanquish isn't your average 29 hardtail. Crush your friends on the climbs, but you won't have any problem keeping up on the descents either. The Vanquish is the natural evolution of our popular TransAM 29 model. Smooth and light carbon frame with the aggressive frame geometry we have had years to perfect. The Vanquish might be the closest thing to an XC bike that we've ever done, but the Transition spirit shows through and this bike still likes to party.
