SUPPRESSOR OVERVIEW

The all new Suppressor is the 26" brother of the Patrol and gives you the control of a downhill bike perfectly balanced with a lively and jumpy personality for a comfortable, efficient and fun ride in almost any trail condition. The Suppressor is long and low with a slack 65 degree head angle and big wheelbase for tremendous stability in rowdy terrain. But don't let the numbers fool you; the short 430mm chainstay and 155mm of active and carefully tuned suspension keep you in touch with the ground and ready to respond at a moment's notice. With the Suppressor you get big mountain confidence with trail bike agility in the same machine.

Progressive Geometry - Long, Low and Slack
GIDDY UP LINK SUSPENSION, 155mm Rear and 160mm Front
Integrated Rubber Chainstay Protection
Collet Style Main Pivot Hardware
E2 Low Direct Mount Front Derailleur Support

Full Size Water Bottle Fits Inside Front Triangle
User Friendly 73mm Threaded Bottom Bracket
Internal Cable Routing with Stealth Dropper Post Routing
Medium Frame Weight With Rear Shock: 7.85 lbs.

09:05 |

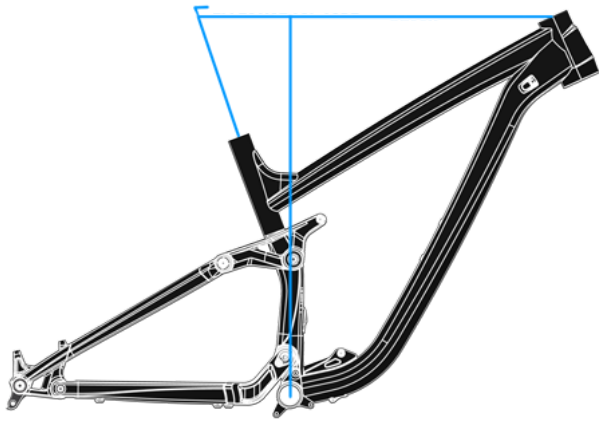

"It is playful, fast, and loves getting pushed hard in the corners. It's predictable, consistent, and surprisingly forgiving when I do stupid things. I'm not sure that I'll personally go back to a 26" wheeled bike as an every day driver, but for those that are true to those roots or just prefer that size, the Transition Suppressor offer all the benefits of modern geometry and technology in a slightly smaller wheel." - Todd Helinga NSMB.com [CLICK HERE FOR THE FULL REVIEW](#)
